All birds need a reliable source of fresh, clean water for drinking and bathing. Additionally, adding a bird bath to your garden is a great way to attract birds that don’t necessarily eat seeds and wouldn’t otherwise come to your feeders. To attract the most birds, make sure your bird bath is full of water and free of debris at all times. By changing the water frequently, you can prevent any mosquito eggs that are laid in the bath from hatching.

If you have any questions about the baths pictured below, or our other backyard-birding products, please give us a call at 850-386-2114.
